Project Name	A Novel Method for Handwritten Digit Recognition System

Create a Project folder which contains files as shown below

- We are building a Flask Application which needs HTML pages stored in the templates folder and a python script app.py for server side scripting.
- The model is built in the notebook Model_building.ipynb
- We need the model which is saved and the saved model in this content is mnistCNN.h5
- The static folder will contain css and images files.
- The templates mainly used here are index.html and predict.html for showcasing the UI
